„The tree in focus“

## „The tree in focus“

It is not that long ago that Philou was joyfully wandering around in his most favourite forest. When he thinks back on his walk he has to grin because he discovered something very special. A tree. Philou thinks it is a marvellous tree. Its bark is very special: a little bit rough but also a little bit smooth. And the crown of the tree, held up by dozens of branches, is enchanting.

“Today is a perfect day to visit the tree again,” Philou decides and starts to walk off in the direction of the forest.

But where was the tree again? It isn't that easy to find. After all there are sooo many trees in the forest. Philou only discovered the beauty of this special tree when he was standing close by it. So he is walking through the forest in search of his special tree.

Sometimes he thinks to himself: “Maybe this is the one!”, but he is never quite certain. Until suddenly, he spots a tree in the distance: “Oh, this could be it!”

Philou runs to that spot – and indeed: it is Philou's marvellous tree! “It does look rather different from afar than from up close,” Philou thinks to himself, “and when you only look at one part of the tree – for example the bark – it looks totally different again... That's interesting!”

Then Philou has an idea: He wants to take photographs of the tree! From different perspectives. One from close up, another one from afar, and one picture showing just a detail of it.

## Fotografieren & Perspektive

### Du brauchst:

- » **Kamera**  
oder ein
- » **Handy mit Kamerafunktion**
- » **Computer, Drucker**

### ...und so geht's:

1. Suche dir ein Motiv im Gruppenraum, zum Beispiel ein Puppenhaus, ein Stofftier, ein Bild, ...
2. Schalte die Kamera ein.
3. Fotografiere das Motiv aus verschiedenen Blickwinkeln:
  - Das Motiv von ganz fern
  - Das Motiv von ganz nah
  - einen Ausschnitt/Teil des Motivs
4. Drucke gemeinsam mit einem Erwachsenen deine drei Bilder aus.
5. Seht euch gemeinsam in der Gruppe alle eure Bilder an:
  - Erkennst du die Motive? Was ist zu sehen?
  - Auf welchem der drei Bilder gefällt dir das jeweilige Motiv am besten?

### Tip:

Es kann mit den Bildern auch ein Such-Spiel gemacht werden, wobei die Bilder aller Kinder vermischt werden und immer die drei zusammengehörigen Bilder gefunden werden müssen.
